

FIG. 2 PG. 36

X DWG. SPACE = 33 ✓	OBJECT L =	$\frac{1:1}{5}$	$\frac{2:1}{10}$	SPACING	$\frac{1:1}{1}$	$\frac{2:1}{2}$
Y DWG. SPACE = 21 ✓	W =	3	6			
	H =	4	8			

$$X = \frac{X \text{ DWG. SPACE} - (L + \text{SPACE} + W)}{2}$$

$$X = \frac{33 - (10 + 2 + 6)}{2} = \frac{33 - 18}{2} = \frac{15}{2} = 7.5 \rightarrow \textcircled{8} \checkmark$$

$$Y = \frac{Y \text{ DWG. AREA} - (H + \text{SPACE} + W)}{2}$$

$$Y = \frac{21 - (8 + 2 + 6)}{2} = \frac{21 - 16}{2} = \frac{5}{2} = 2.5 \rightarrow \textcircled{3} \checkmark$$
